Subject Index	51

PREFACE

Scope

The Bibliography primarily focuses on references to documents covering a number of issues relating to pollution including water quality, contamination, protection of water resources, ocean and atmospheric processes, sources of pollution, analytical methods, surveys, reports, and studies. The Bibliography predominantly focuses on Pacific island countries, however, a number of references on Australia and New Zealand are also included in view of their relevance to the island countries. This compilation is a result of a progressive exercise over a period of time and attempts to list primarily literature generated during the past one and a half decades. Like most bibliographies it is practically impossible to create an exhaustive list of references on a subject, therefore a number of pertinent documents may have been missed.

Arrangement

The Bibliography provides separate listings by author categorised under country names. In the case of identical authors sorting is done by the year of publication and those with identical dates are sorted by the title. However, it commences with a 'Pacific - General Information' category. This publication also includes author and subject indexes.

In addition to personal names, the **Author Index** also includes names of organisations, institutions etc. as appropriate. The **Subject Index** comprises of the terms that most appropriately describe the subject content of the documents. The numbers given in the indexes correspond to the specific number of the reference in the main Bibliography.

Annotations

Some of the references include brief annotations or summary notes for additional information to the users of this publication. The provision of annotations for all the references was not intended primarily in view of the lack of human resources and access to original items.

Acknowledgements

Acknowledgement is extended to Ana Naisaboca (of USP library) and Nirmala Gounder (PIMRIS Assistant) for their clerical assistance.

Acknowledgement is also extended to the International Centre for Ocean Development (ICOD)/Canadian International Development Agency (CIDA) of Canada, for the financial assistance provided for publishing this Bibliography.

Previous Document

This Bibliography is a revised, edited and updated document from an unpublished draft "Coastal and Inland Water Quality in the South Pacific" by R. J. Morrison. The draft was prepared for the Fifth SPREE Consultative Meeting, Suva, Fiji in June 1990.

Correspondence

Users of this publication are encouraged to send:

- i. any corrections to the bibliographic data as entered in the references;
- ii. references of more recent items and editions/updates published of any documents listed in this bibliography; and
- iii. requests for copies of the Bibliography, to:

40. Orians, K.J. and Bruland, K.W. 1986. The biogeochemistry of aluminium (sic) in the Pacific Ocean. *Earth and Planetary Science Letters*, 78 : 397-410.
41. Parango, F.P., Nagamoto, C.T., Rosinski, J. and Haagenson, P.L. 1986. A study of marine aerosols over the Pacific Ocean. *Journal of Atmospheric Chemistry*, 4 : 199-226.

Rainfall data collected 150° W & 170°W from 47°N to 55oS.
42. Patterson, T.L. and Duce, R.L. 1991. The cycle of atmospheric cadmium in the North Pacific. *Tellus*, 43B : 12-29.

In N. Pacific Rain (35-5CN). In surface seawater. Cd 1.2-9.9 ng/kg, Pb 26-270 ng/kg, Cd 16-44 pmol/kg.
43. Peltzer, E.T. and Gogosian, R.B. 1989. Organic geochemistry of aerosols over the Pacific Ocean. *Chemical Oceanography*, 10 : 281-338.
44. Prospero, J.M., Uematsu, M. and Savoie, D.L. 1989. Mineral aerosol transport to the Pacific Ocean. *Chemical Oceanography*, 10 : 188-219.

Valuable data on aerosol dust composition and decomposition rates.

45. Prospero, J.M. and Savoie, D.L. 1989. Effect of continental sources on nitrate concentrations over the Pacific Ocean. *Nature*, 339 : 687-689.
46. Roemmich, D. and Cornuelle, B. 1990. Observing the fluctuations of gyre-scale ocean circulation : a study of the subtropical South Pacific. *Journal of Physical Oceanography*, 20 : 1919-34.
- Time series XBT sections NZ-Fiji. Eddy resolving transects along repeating ship track. 3 recurring small scale features - E. Auckland Current, front at 28°S, Trop. Converg. at 22°S. 1987-8 1989-90 reversal of flow at ocean surface S of Fiji.
47. Rogers, C.S. 1990. Responses of coral reefs and reef organisms to sedimentation. *Mar. Ecol. Prog. Ser.*, 62 : 185-202.
48. Saltzman, E.S., Savoie, D.L., Prospero, J.M. and Zika, R.G. 1986. Methanesulphonic acid and non-sea-salt sulphate in Pacific air : regional and seasonal variations. *Journal of Atmospheric Chemistry*, 4 : 227-240.
49. Savoie, D.L. and Prospero, J.M. 1989. Comparison of oceanic and continental sources of non-sea-salt sulphate over the Pacific Ocean. *Nature*, 339: 685-7.
50. Savoie, D.L., Prospero, J.M. and Saltzman, E.S. 1989. Nitrate non-seasalt sulphate and methanesulfonate over the Pacific Ocean. *Chemical Oceanography*, 10.
- Valuable review of recent data on NO₃, nssSO₄, methanesulphonate. Low NO₃⁻ in American Samoa, Rarotonga, Tuvalu. Higher in Fanning, Oahu, Norfolk, N. Caledonia. nssSO₄ lowest Norfolk Island, Highest in Equatorial region. Amomalous N-Cal. value - 0.42 ugm³, Norfolk - 0.23 - closer to Australia - could this be due to SO₂ from smelters? Methanesulphonate (MSA) Highest in N. Pacific. Higher than average in high productivity equatorial divergence region. Low in other stations. Significant correlation between DMS and chlorophyll-a (indicator of standing stock of phytoplankton).

90. Meyers, G., Sprintall, J., Phillips, H., Peterson, J. and Fonseca, T. Design of an ocean temperature observing network for the seas north of Australia. Part 1. Tropical Pacific Ocean : Statistics. CSIRO Marine Laboratories Report 204, Hobart, Australia.

This report is a compilation of the statistical data required for design of an ocean temperature observing network in the tropical Pacific, using the method of optimum interpolation (OI). The statistics were estimated from a data base of expendable bathythermograph observations on the shipping routes New Caledonia-Japan; New Caledonia-Hawaii and Tahiti-Panama, The temporal and

meridional autocorrelation function (ACF) for the sea-surface temperature and depth of the 20°C isotherm was estimated at each degree latitude on each route. Additional data were used to estimate the zonal ACF. The ACF statistics permit estimation of the parameters required for OI : levels of signal and noise variance for each field and spatial/temporal decorrelation scales. The OI parameters are then summarised in large areas selected to represent the major currents.

SUBJECT INDEX

- Acid Rain - 34, 66, 67, 151, 239, 262, 263, 265, 272, 284.
- Arsenic - 385.
- Atmospheric processes - 4, 19, 33, 34, 39, 42, 48, 252, 259, 262, 263, 271, 275, 284, 314, 315, 317, 337, 341.
- Baseline studies - 115, 117, 131, 137, 138, 202, 254, 328, 343, 344, 345, 369, 373, 382, 383, 384, 386.
- Bibliographies/Catalogs - 17, 197.
- Biochemistry - 201, 210, 211, 219, 231.
- Biogeochemistry - 31, 40, 238, 241, 274, 324, 348, 370, 371.
- Cadmium - 88, 353.
- Carbon particulate - 11, 264.
- Chemical pollution - 2, 3, 52, 53, 151, 155, 157, 176, 222, 240, 246, 253, 264, 265, 272, 295, 296.
- Ciguatera - 120, 225, 234.
- Copper - 8, 15, 16, 277, 284, 325, 351, 352, 353, 359.
- Cromium - 16, 319, 325.
- Development impact - 138, 141, 142, 143, 150, 160, 163, 172, 198, 202, 204, 205, 206, 207, 208, 213, 232, 242, 266, 340, 347, 354, 357, 360, 378.
- Dredging - 62, 111, 122, 144, 163, 207, 285.
- Ecosystem - 29, 47, 69, 70, 75, 86, 88, 108, 109, 110, 111, 113, 130, 134, 143, 147, 148, 150, 157, 168, 176, 178, 180, 181, 186, 189, 194, 198, 199, 204, 205, 206, 208, 209, 212, 213, 216, 218, 219, 223, 243, 253, 255, 261, 280, 293, 307, 308, 309, 326, 349, 355, 368, 376, 379.
- Environmental management - 24, 77, 93, 100, 132, 144, 192, 218, 389, 390.
- Environmental protection - 57, 77, 100, 125, 140.

Eutrophication	- 69, 70, 223.
Geochemistry	- 12, 43, 79, 165, 168.
Giant clams	- 5.
Heavy metals	- 87, 92, 94, 136, 166, 187, 273, 281, 291, 292, 297, 301, 302, 304, 306, 313, 318, 320, 325, 327, 329, 334, 335, 336, 352, 353, 354, 357, 358.
Iron	- 16, 31, 325, 348.
Lead	- 16, 63, 262, 265, 295, 296, 325, 352.
Manganese	- 15, 16, 30, 31, 104, 325, 348.
Marine aerosol	- 14, 41, 44, 276.
Mercury contamination	- 1, 19, 73, 156, 300, 312, 325, 330, 331, 334, 335, 361, 364, 365.
Methodology	- 278, 299, 337.
Molybdenum	- 16.
Monitoring and Assessment	- 9, 22, 32, 56, 64, 76, 106, 107, 116, 126, 129, 132, 169, 179, 236, 343, 349, 359, 360, 362, 376.
Nickel	- 277, 289, 325.
Nitrates/Nitrites	- 49, 59.
Ocean processes	- 7, 19, 44, 46, 90, 128, 197, 200, 231, 233, 248, 249, 250, 286, 294, 310, 314, 315, 326, 338, 341, 346, 348, 363, 367, 380.
Organic pollutants	- 68, 72, 83, 84, 85, 91, 95, 98, 99, 255, 258, 264, 279, 282, 287, 308, 311, 327, 344, 345, 346, 349, 355, 360.
Pesticide problems	- 38, 102, 166, 174, 221, 321, 332, 339.
Phosphorus	- 16, 26, 154, 203, 276, 290.
Pollution control	- 25, 139, 358, 373.
Pollution problems	- 6, 37, 45, 119, 159, 161, 171, 173, 225, 226, 281, 282, 310, 311, 355, 374.
Radium	- 13.

Reefs	- 25, 47, 70, 75, 80, 130, 163, 167, 172, 191, 193, 198, 203, 212, 213, 214, 215, 222, 235, 242, 253, 258, 261, 264, 341, 355, 368, 370, 371, 388, 389, 390.
Redtides	- 71, 82, 211.
Sedimentation	- 12, 20, 23, 26, 32, 47, 54, 72, 78, 79, 80, 91, 96, 103, 105, 121, 191, 193, 215, 235, 279, 280, 283, 287, 288, 291, 295, 303, 316, 351.
Sewage	- 133.
Sulphates	- 49, 50.
Surveys	- 38, 64, 104, 108, 109, 110, 111, 112, 114, 118, 120, 123, 124, 126, 146, 155, 196, 217, 224, 229, 236, 237, 244, 245, 256, 268, 293, 311, 320, 333, 339, 340, 342, 349, 358, 364, 375, 376, 381, 389.
Tetracycline	-23.
Trace metals	- 2, 3, 12, 55, 61, 72, 131, 135, 195, 247, 251, 252, 271, 274, 298, 339, 356, 385.
Uranium/Trans-uranics	- 51, 253, 260.
Waste disposal	- 10, 21, 37, 58, 65, 89, 132* 133, 141, 188, 190, 192, 199, 209, 212, 220, 223, 227, 233, 244, 245, 270, 294, 305, 306, 307, 333, 342, 344, 346, 354, 362.
Water quality	- 82, 101, 111, 115, 127, 133, 138, 151, 153, 228, 257, 258, 328, 343, 344, 369, 382, 383, 384, 385, 386, 387.
Zinc	- 15, 325, 348, 352.
